

Dr. Pulane Koosaletse-Mswela is a Senior Lecturer in Environmental Science at the University of Botswana with expertise in environmental quality, waste management, resource recovery, and climate resilience under the One Health framework. Her research focuses on wastewater quality, air pollution, environmental contamination, circular economy innovations, and sustainable environmental management within the context of climate change and sustainable development. She currently serves as Secretary General of the Botswana Academy of Science, and is the inaugural Vice Chair of the OWSD Botswana National Chapter, where she promotes science-policy engagement, gender equality, and inclusive excellence in STEM. Within the RECLAIM Project, Dr. Pulane serves as the University of Botswana Partner Coordinator, supporting climate education, capacity building, and stakeholder collaboration to strengthen climate resilience and green skills development across Africa.
